

# Abhishek Sharma

Innovative Software Engineer with expertise in Javascript and Web Development. Offering 5+ years of experience in a full software development lifecycle. Quickly learn and master new technologies and work in both team and self-directed settings.

## EXPERIENCE

### Software Engineer II— *Airasia Technologies, Bangalore*

JANUARY 2020 - PRESENT

- Leading BigXchange frontend development initiative as Subject Matter Expert and primary point-of-contact for project management staff.
- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations.
- Managed full-cycle design tasks, handling all phases from conception to completion while maintaining and guidelines throughout.

### Sr. Software Developer— *Hippo Innovations, Gurugram*

MAY 2018 - JANUARY 2020

- Orchestrated efficient large-scale software deployments, including testing features and correcting code.
- Monitored ongoing operation of assigned programs and responded to problems by diagnosing and correcting logic and coding errors.
- Trained new developers and programmers on company standards for design and review.
- Created procedures for system monitoring, recovery, backup and optimization.

### JavaScript Developer — *Typito Technologies, Bangalore*

SEPTEMBER 2017 - MAY-2018

- Enhancing the video editing platform typito.com with advanced editing features.
- Added features on the basis of customer requests analysis.
- Gathering data for analytics based on user events and Email marketing strategies.

### Full Stack Web Developer — *Urbanwand, Gurugram*

SEPTEMBER 2015 - AUGUST 2017

- Member for founding team and led the core product development.
- Responsible for Web apps, databases management, deployments and APIs as well as UI.
- Delivered performance-driven and user-centric websites that met all business requirements.

## EDUCATION

### **Kurukshetra University, Kurukshetra — B. Tech. (CSE)**

May 2011 - July 2015

## PROJECTS

### **BigXchange — Airasia Technologies**

Working on customer facing mobile first web application developed with React.js. This application provides an interface to the end users so that they can convert their loyalty points from other platforms to AirAsia Big Points and vice versa.

Leading the front-end development of the project and besides development, I also manage the interaction and integration with the other services.

### **StoreHippo — Hippo Innovations**

Led the backend development for the e-commerce platform. Besides development of new features, I was also responsible for managing the sprints, tasks allotments, requirement analysis etc.

<https://www.storehippo.com/>

### **Shipkaro — Hippo Innovations**

Led the backend development for the logistics platform built on top of storehippo.

Shipkaro is a logistics aggregator platform providing advanced features such as tracking, scheduling, delivery reports, invoice reconciliations, 3<sup>rd</sup> Party logistics integrations such as Bluedart, USPS, DHL, Delhivery etc.

I was leading the development and maintenance of the platform.

Daily tasks included bug fixes, logistics partner integrations, automations etc.

<https://www.shipkaro.com/>

### **Typito — Typito Technologies**

Worked as full stack javascript developer and was responsible for customer facing interface design and enhancements.

Day to day tasks involved platform enhancements and customer reported bug fixes.
